

## WM 130/230 series

Thermoform Machines for producing blisterpacks  
with lidding film

*Picture shows customer machine with special features*

With the WM 130/230 series, we offer a cost-effective and efficient version for the production of classic blister and thermoform packages with PVC or PET forming film and heatsealable lidding film (e.g. Alu, PET or paper foils)

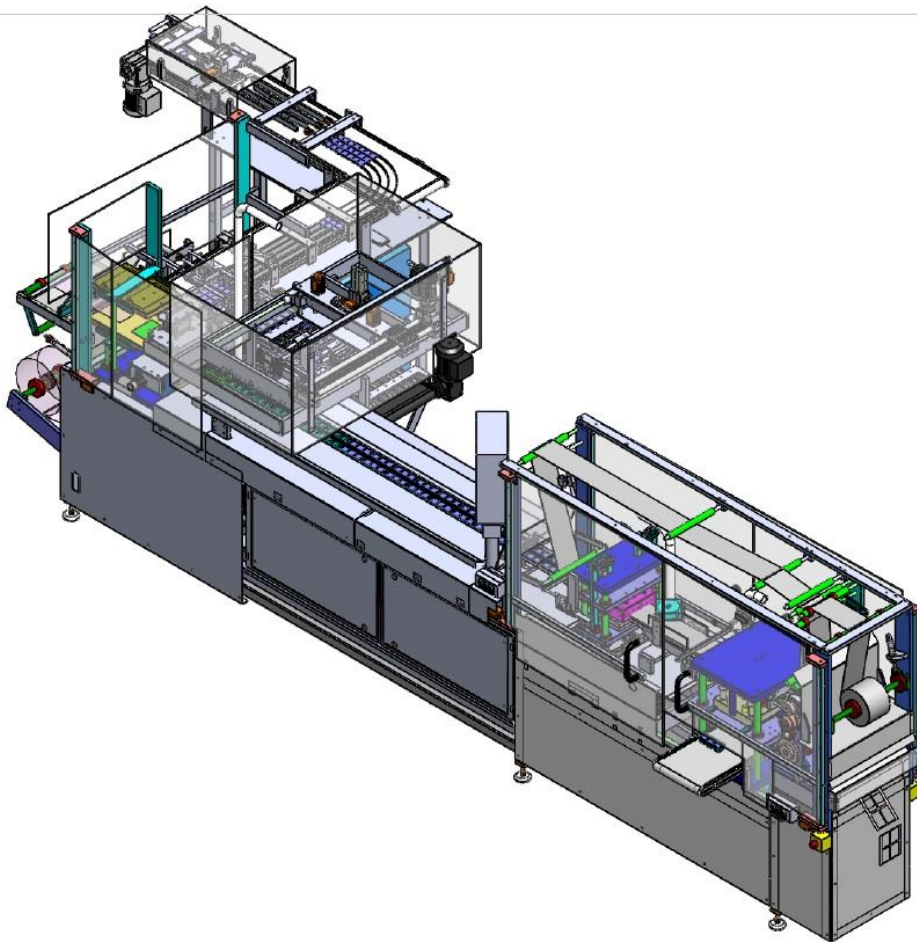

## Technical Highlights

- Easy to use operation
- Fast, tool-free and reproducible format change
- Narrow design for optimal accessibility from both sides
- Cutting by means of knives or die-cutting unit
- Multiple tracks production possible for high output

Our strength is also the adaptation of the machines to special customer requirements. The following special designs have already been realized:

- Flexible lengths of feeding area
- Automatic positioning of blister pocket inside sealing and die-cutting station
- Automatic Feeding units, e.g. by means of pick & place system
- Machine combinations WM 120/130 for blister production with card back or lidding foil by simple activation of working stations.

*Design of our solutions in 3D with Solid-Works*

## Technical Data WM 130/230:

| Modell | No. of lanes | Max. blister size | Output/speed         |
|--------|--------------|-------------------|----------------------|
| WM 130 | 1            | 220 x 110 x 50 mm | Max. 20 Blister/min. |
| WM 136 | 2            | 100 x 280 x 50 mm | Max. 40 Blister/min. |
| WM 230 | 1            | 330 x 280 x 50 mm | Max. 20 Blister/min. |
| WM 236 | 2            | 160 x 280 x 50 mm | Max. 40 Blister/min. |

*All mentioned speeds depending on blister shape and size and packaging material.*

*Technical data for machines with multiple lanes depending on customer requirements.*

## Product Range of WENZ Blister-Verpackungstechnik

- Thermoform Machines for production of blisters with card back
- Thermoform Machines for production of blisters with lidding film
- Cartoning and Wallet Machines
- Transport, Handling Systems and customized special applications
